PROFESSIONAL SUMMARY

Data Analyst (B.Sc. Applied Statistics and Data Analytics, KMITL) with hands-on experience building sales data pipelines, dashboards and internal web apps in a company setting. Migrated 86 Power Query queries to Python/Pandas with totals matching the original Excel on ~90,000 rows, and cut store check-in photo review from ~30 to ~5 minutes with a store-visit web app. Proficient in Python, SQL, Power BI and Looker Studio.

WORK EXPERIENCE

3 Aug 2026 - Present

Deli Development - Data Marketing Analyst

- Migrated 86 Power Query queries to Python/Pandas (~90,000 rows); totals match the original Excel exactly.
- Built 3 daily Looker Studio dashboards for 8 sales and admin staff; time to get daily figures cut from 25 to 3 minutes.
- Built DeliMap, a store-visit web app with zone-based access; check-in photo review cut from ~30 to ~5 minutes (80%+ faster).
- Redesigned Deli Workspace, the marketing team's task app, into a softer, modern light theme that keeps the brand colors.
- Built a Roblox game end to end around the company's Capypets character IP; now open for testing.
- Compared cloud vs self-hosted infrastructure for executives (~THB 18-30k/year vs ~35k one-time); self-hosted chosen; wrote the handover document for the migration team.

INTERNSHIP, PROJECTS & THESIS

Covest Labs Co., Ltd. - Data Analyst Intern (Dec 2025 - Apr 2026)

- Built Looker Studio dashboards visualizing poll response data by province to support stakeholder decision-making.
- Designed an ETL workflow to clean and structure a 500+ record election dataset for downstream analysis. (ETL, Data Pipeline, Data Quality)

Traffic Simulation & Optimization (Thesis)

- Developed a Shapley Value-based traffic signal control algorithm from 9 days of traffic volume data and compared it with Fixed-Time control in SUMO simulation; reduced average waiting time by up to 44.39%, validated through statistical evaluation. (Python, SUMO, Statistical Analysis, Algorithm Development)

Data-Driven Marketing & Business Analysis

- Analyzed survey data from 166 respondents and scraped market data to identify purchasing patterns and brand perception gaps for ISUZU D-Max; designed two prototype solutions presented at KMITL Innovation Expo 2023. (Google Sheets, Power BI, Web Scraping, Statistical Analysis)

Database Design & Development

- Designed relational databases and ER diagrams for a Dormitory Information Management website (Project Manager & Consultant) and a Meeting Room Booking System. (SQL, ER Diagram, FastAPI)

TECHNICAL SKILLS

- Data Analysis & ETL: Python (Pandas, NumPy), SQL, Power Query, ETL / Data Pipelines, Web Scraping, EDA, Statistical Modeling
- Data Visualization : Power BI, Google Looker Studio, Microsoft Excel / Google Sheets
- Databases & Dev Tools: TiDB, Relational Database Design, ER Diagram, Next.js, FastAPI, Git / GitHub, VS Code, DBeaver

CERTIFICATIONS

- Certificate of Competency and Skills Assessment for Science & Technology Graduates — Applied Statistics and Data Analytics, KMITL (2025)

EDUCATION

2022 – May 2026

King Mongkut's Institute of Technology Ladkrabang

Degree: Bachelor of Science

Major : Applied Statistics and Data Analytics
